

Working in high risk environments

European Interagency Security Forum

Oliver Behn

Berlin, 30th of October 2009

eisf

1. Risk Mitigation Strategies
2. Allocation of Resources
3. Transparency of Information

1. Risk Mitigation Strategies

- Acceptance
 - Locally
 - Strategically
- Protection
- Deterrence

2. Allocation of Resources

- Are the resources enough?
- Are the resources distributed effectively?
 - Different staff risk levels
 - Short term versus long term investment

Transparency between Agencies

- What are the bottle-necks for sharing?
 - No systematic approach
 - Internal risk perception
 - Peer views
- What are the risks for not sharing?
 - Incorrect analyses leading to unnecessary risks.

Transparency between Agencies

Conclusion

- **A request to** reflect on security strategies to find the best mix of approaches for a given place at any given time.
- **A plea to** resource risk management appropriately and build capacity.
- **A demand to** share knowledge, experience, mistakes made and lessons learned.
